Datalab

DATALAB POWERED BY CLEANTECHHUB

OPEN CONSORTIUM · DATALAB

Open Air Sandbox

A shared workspace where companies, researchers, and innovators work on air quality under clear rules. You bring a use case and the data you are willing to share. You keep control of what stays private. Datalab, powered by CleantechHUB, runs the infrastructure inside the Earth Observatory at Universidad Externado de Colombia.

Steward model

The sandbox sets access and traceability. Partners bring use cases and permitted data without giving up control of sensitive assets.

Datalab role

Datalab provides infrastructure and a test environment so the group can move from exploration to decisions.

Air4U case

Clean Air for Health Sandbox

First live case: air quality, data intake, and risk dashboards. A corporate partner would work in the same kind of space on a question from their own operations, communities, or public-health surroundings.

Consortium

INNOVATION PARTNER

AIR4U
AIRE PURO PARA TI

Air4U - Clean Air for Health Sandbox

DATA CUSTODIAN

CleantechHUB
Inspira. Actúa. Transforma.

CTH - Data infrastructure, access rules and traceability

RESEARCH PARTNER

Universidad Externado de Colombia

Externado - Earth Observatory, Tecnológica lens

CORPORATE PARTNER · OPEN SLOT

+

Your company here

The corporate seat

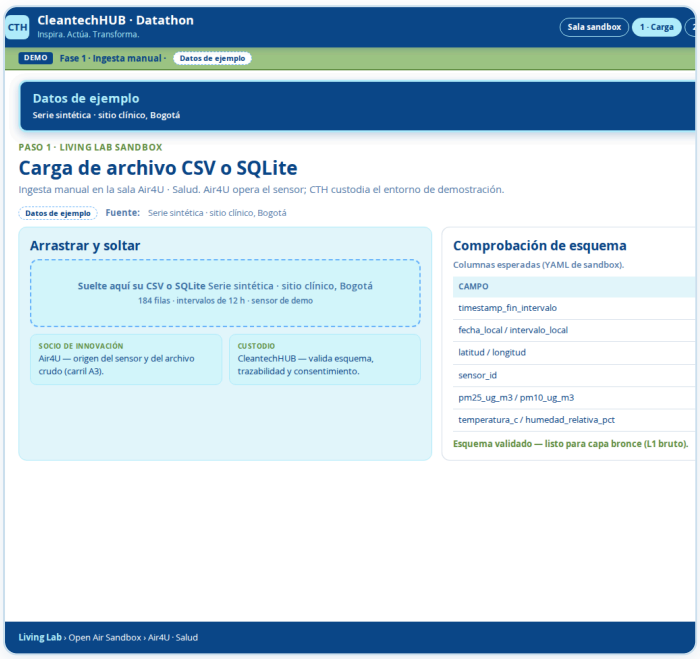

- The consortium has one open corporate seat.
- You bring: a real air-quality or environment-and-health question, plus the data you can permit.
- You get: a governed workspace (visualization, data intake, risk dashboards) without handing over control of sensitive assets.
- Already at the table: Air4U (innovation), CleantechHUB (data custodian), Externado (research).

cleantechhub.net · datalab.cleantechhub.net — Contact us to reserve the corporate seat

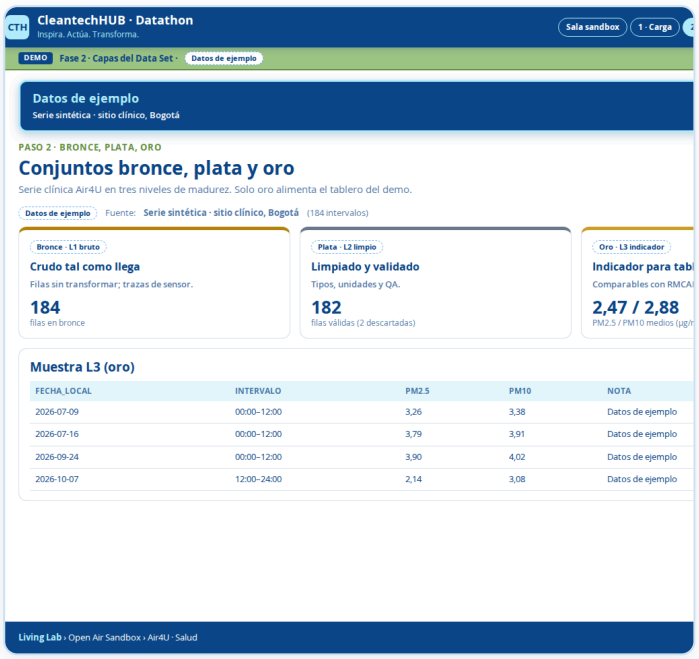

From exploration to action

These are the environment views a partner team would use; sample data where marked.

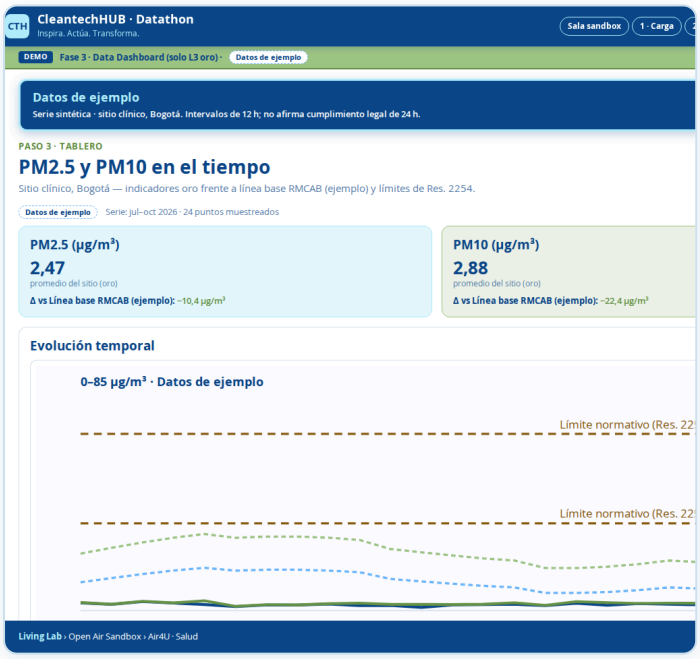

Open Air Sandbox connects sensors, open data, and multidisciplinary teams. Datalab environment views with sample data where applicable.

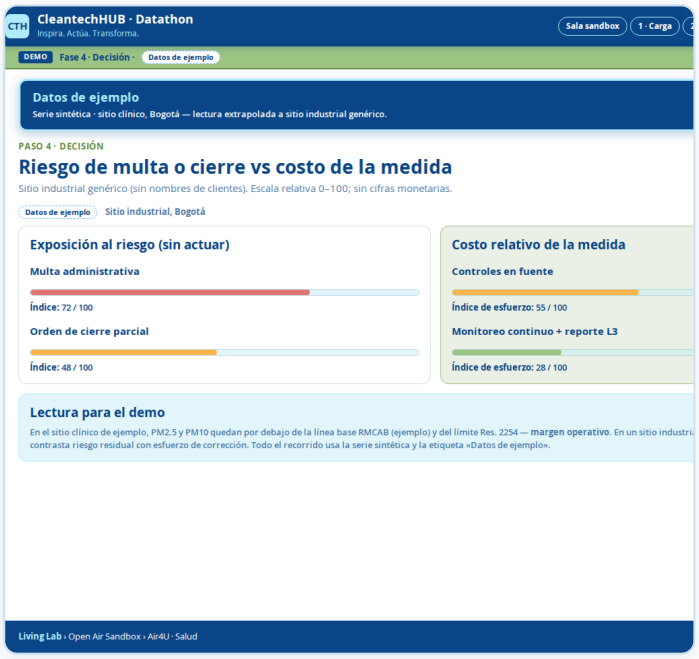

Load data into the sandbox

Cleaned, documented datasets

Air quality over time (PM2.5 and PM10)

Risk of not acting versus the cost of a measure

Datalab environment, demo data

The same steward model will open to other resources; these seats are also open if air is not your only line.

In development

Open Waste Sandbox
We invite industry and academic actors to co-design the next circular waste consortium.

Open Energy Sandbox
Space for energy transition pilots with shared data and steward governance.

Open Water Sandbox
Upcoming line for water quality and basins. Join as a founding partner organization.
