Datalab

powered by CleantechHUB

Observatorio de la Tierra

OPEN CONSORTIUM · DATALAB

Open Air Sandbox

Steward model with shared data and tools under clear rules. Datalab is the engine under the **Tecnológica** lens of the Earth Observatory at Universidad Externado de Colombia.

Steward model

The steward custodies the sandbox, sets access, and keeps traceability. Partners bring use cases and permitted data without giving up control of sensitive assets.

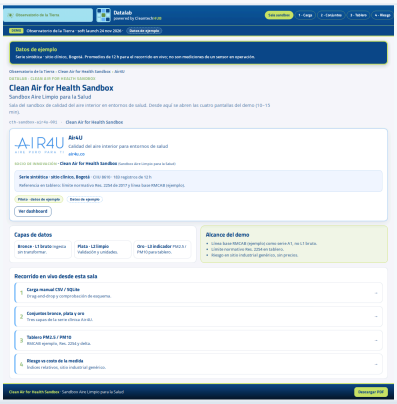

Datalab role

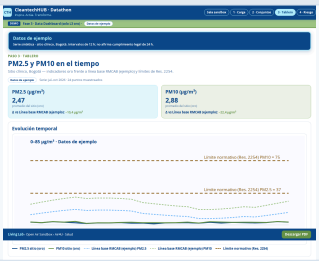

Infrastructure, test environments, and technical governance to move from exploration to decisions with Datalab powered by CleantechHUB co-branding.

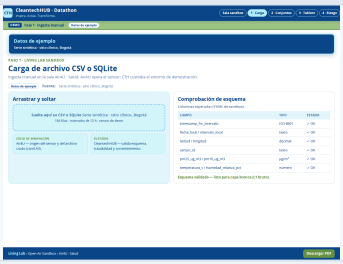

Air4U case

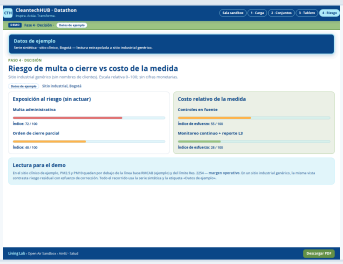

Clean Air for Health Sandbox

First active case: air quality visualization, data ingestion, and risk dashboards for public health and technical teams.

Datalab

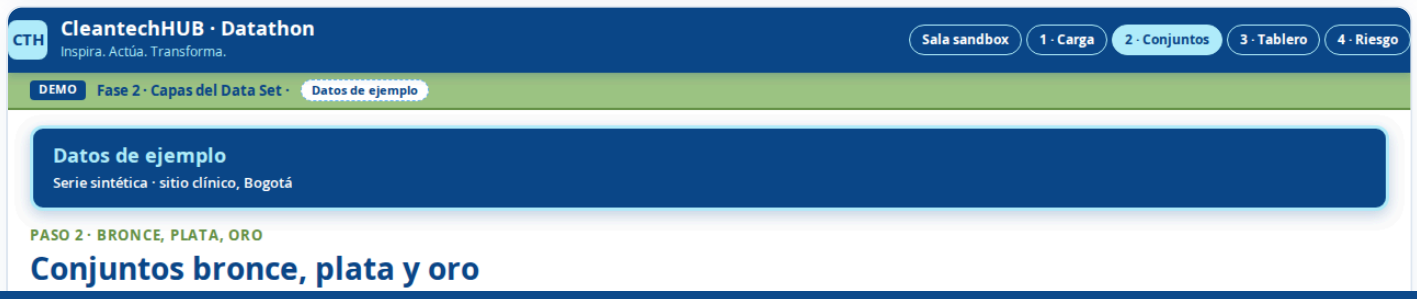

powered by CleantechHUB

Observatorio de la Tierra

From exploration to action

Open Air Sandbox connects sensors, open data, and multidisciplinary teams. Full captures from the Datalab environment (sample data where applicable).

In development

Open Waste Sandbox
We invite industry and academic actors to co-design the next circular waste consortium.

Open Energy Sandbox
Space for energy transition pilots with shared data and steward governance.

Open Water Sandbox
Upcoming line for water quality and basins. Join as a founding partner organization.
