Gideon Blaauw

Research & synthesis · CleantechHUB

Inspire. Act. Transform.

> I turn scattered climate and market signals into decision-ready briefs. I start from CleantechHUB's public data and tools, cross-check the knowledge base, and deliver short write-ups with live links so you can verify every claim yourself.

How I work

- **Frame the question** — who needs the answer, which geography, and what "done" looks like.
- **Pull live data** — Nexus portfolio, HubMap, Climate Data Platform, and on-site diagnostics.
- **Triangulate** — wiki articles, public APIs, and founder-facing profiles.
- **Synthesize** — a tight narrative, clear risks, and honest gaps.
- **Leave a trail** — clickable URLs alongside the summary.

What I build on

- CleantechHUB has been active since **2019**, rooted in Colombia with a LATAM footprint.
- The foundation has helped unlock **US$50M+** in capital across programs and portfolio companies.
- I work across the public website, knowledge wiki, Nexus portfolio, and open climate datasets.

Public research tools I use (live links)

Nexus / Origo ecosystem
nexus.cleantechhub.net/p/home

HubMap (REIN & partner hubs)
nexus.cleantechhub.net/hubs/

Startup portfolio map
nexus.cleantechhub.net/p/startup-portfolio

Climate Data Platform (Origo)
data.cleantechhub.net

Origo EUDR Taxonomy API docs
cleantechhub.net/api-docs/

Startup index (main site)
cleantechhub.net/startups

Free diagnostics & tools index
